

## FOR IMMEDIATE RELEASE

### 'RK Da House... Yard'

TRUAUDIO Significantly Expands RK Line of "Rock Speakers" Category

SALT LAKE CITY, UTAH – January 15<sup>th</sup>, 2006 – Rock Speakers have quickly become a staple in the TruAudio lineup as people are now bringing their home entertainment outdoors more and more. Due to increasing demand, the improved and expanded RK Series now come in four colors rather than two, boast even better performance, and have greatly increased UV resistance. To better match the décor of their outdoor environment, clients can choose from the traditional Grey and Tan as well as the new Limestone and Granite colors.

Part of the Elements Series of environmental speakers, the RK line is available in three different varieties, the RK-6 (\$500/pr), RK-8 (\$600/pr) and RKD-8 (\$400/ea). The RK-6 incorporates a 6.5" woofer, a 1" titanium tweeter, a micromesh grill, a frequency range of 50 – 20k Hz, 90 db sensitivity and are rated at 100 watts. The RK-8 incorporates an 8" woofer, a 1" titanium tweeter, a micromesh grill, a frequency range of 40 – 20k Hz, 90 db sensitivity and are rated at 150 watts.

If you are tight for space or it is difficult to get speakers wires run to locations for two speakers, the unique RKD-8 is a dual voice coil speaker which allows the user to enjoy stereo from one speaker. It incorporates an 8" woofer, dual aluminum tweeters, a frequency range of 40 – 20k Hz, 90 db sensitivity and is rated at 150 watts. All of the RK speakers are 8 ohm.

The entire line has exceptional sound. The way that the speaker and crossover were developed, was to give them full, rich characteristics that envelopes an outdoor area. It is also worth mentioning that the "weather resistance" on the RK line is outstanding and TruAudio backs that up by putting a lifetime warranty on them. All models are shipping now.
