

FOR IMMEDIATE RELEASE

TRUAUDIO Introduces SUB-88A In-Wall Sub Woofer

SALT LAKE CITY, UTAH – June 1, 2003 – After years of research and development, TruAudio unveiled today the ultimate in-wall subwoofer: Model **SUB-88A**. Featuring dual 8" aluminum woofers in a sleek design, this revolutionary in-wall sub will deliver heart thumping bass without the obtrusive cabinet or taking out your wall. We vowed only to release an in-wall sub we'd be proud to put our name on and **THIS IS IT!**

The **SUB-88A** installs into a MDF cabinet and is designed for new construction or remodels. The MDF cabinet gets installed in-between two 2 x 4 studs before drywall and guarantees the perfect air space every time. The woofers were specifically designed for the in-wall application using less air space directly behind the actual driver.

The cone material on the dual 8's is a high-grade aluminum, known for being extremely strong, yet light. This makes for the tight, undistorted bass reproduction at high volumes. Our crossover was designed with "No Compromises" using only premium parts which are matched to under 4% tolerance.

Bringing it all together we built a custom frame and baffle with extra deep mounting tabs. The **SUB-88A** also features, a 4-8ohms, 200 watts, a range from 37 -200 Hz., micromesh grills and a lifetime warranty. As with most of our products, TruAudio has put a lifetime warranty on the **SUB-88A**.

ABOUT TRUAUDIO

TRU believers in architectural speaker innovation, TruAudio designs and manufactures a full line of premium-quality custom audio products.
